

“Or maybe it doesn’t mean anything. Maybe it doesn’t mean anything at all.”

—Mr. Hippo, FNAF UCN

THE TRIVIAL NOTIONS SEMINAR

Elliot Glazer

will speak on

How many times can you flip a coin?

ABSTRACT

I’ll use coin flipping to disprove the continuum hypothesis. Then I’ll use coin flipping to disprove the axiom of choice. Eventually I’ll annihilate most of the set theoretic universe, with coin flipping of course. Maybe there are limits to how much we can flip a coin. Maybe we can only flip coins in paradise. Anyway, I’ll end the talk by proving the continuum hypothesis.
